

Dear FCC,I recently became aware of a company that is trying to stop XM radio from brocasting some of there chanel's because they are afraid that xm is putting them, out of bizz. I feel that this is a horrible thing to happen. I am a big fan of XM, i own it and enjoy. I think this company dose a great service for it fans and other radio buy bringing up the standards for other radio to stride to be. If the FCC and the US goverment lets this group win you will be telling me that the USA strives for the lowest standards not the highest and that the frist admendment is worthless.
